

Being an Effective Communicator

CommSim Lite **Simulation**

In a world accelerated by digital technologies, effective communication has emerged as one of the cornerstones of organizational success. Fostering a culture where communication is clear and impactful because ineffective communication can lead to misunderstandings, conflict, and diminished productivity. On the other hand, effective communication skills among team members can result in an improved ability to interpret information, articulate ideas, and influence others.

Typical communication skill courses have a theoretical approach and, therefore, fail to create the desired impact on the intended audience. Our simulation-based course, however, creates a fail-safe environment where learners discover approaches that help improve their overall communication skills. Personalized reports powered by AI-based evaluation and feedback give learners dependable insights they can successfully use at work.

Learning Outcomes

- Deconstruct the essentials for effective communication
- Identify the key skills needed to communicate effectively
- Develop best practices that can drive communication more effectively
- Apply the key behaviors in a simulated environment

Business Outcomes

- Enhance collaboration within and between teams through better communication
- Enable high-impact, highly impressive conversations with external stakeholders, clients, and prospects

Ideal for

- For ICs as part of onboarding and baseline skill development
- For FTM's as part of their management skill training on stakeholder management and team leadership
- For managers who need to polish their communication skills
